

## INSTRUCTIONS FOR PROSPECTIVE STUDENTS FOR INDIVIDUAL PROJECTS

(Updated in July 2018.)

If you are a student at the University of Toronto:

If you are a graduate student and would like to check the possibility of doing a MSc or PhD project with me, then please contact me to discuss possibilities. Please include any subset of the following items: your transcript, list of favourite courses, specific interests, something that you wrote, your strengths and weaknesses, names of other professors who know you.

If you are outside the University of Toronto:

I am not available for new projects with students from outside the University of Toronto. To apply for graduate studies at our department, you don't need to connect in advance with a supervisor. Information for prospective graduate students is available through our department website, <http://www.math.toronto.edu/>, under the tab "Graduate".

If you have applied for graduate studies at our department and might be interested in working with me on an MSc/PhD project if and when you join our department, then please let me know that you applied.

If you are not a Canadian citizen nor permanent resident then you should be aware that, sadly, our department has a quota for international graduate students. If you think that our department is a good match for you then please do apply. I particularly encourage you to apply if you are a member of an underrepresented group; as such, you should make the biggest effort to get the best training that you can in order to be able to make a bigger impact in the future. Nevertheless, you should be aware that every year the department sadly rejects some spectacular international candidates and if you are not accepted you should not let this discourage you.

Yael.
