1. Introduction

This is an appendix to my paper "On Khovanov's Categorification of the Jones Polynomial" containing some of the values of $Kh(L)$ for links L with 11 crossings. I use the same notation as in the parent paper.

Acknowledgement. I wish to thank Morwen Thistlethwaite for supplying the list of links and their nice figures, and I wish to thank Dylan Thurston for converting Thistlethwaite's list into my format.

Warning. The numbering of the links is completely arbitrary, and the orientation of their components and of $\mathbf{R}^3$ is not even specified. Due to the complicated nature of this affair and the number of hands that were involved, some mistakes may have crept in.

Note. Two computers are working on this task right now, and so this table is being filled from both ends at the same time.
