

DEPARTMENT OF MATHEMATICS  
University of Toronto

**Complex Analysis Exam ( $1\frac{1}{2}$  hours)**

*Friday, May 7, 2004, 1–2:30 p.m.*

No aids.

Do all questions.

Questions will be weighted equally.

1. (a) Define normal family of analytic functions.  
(b) Let  $\mathcal{F} = \{f \mid f \text{ is holomorphic in } |z| < 1 \text{ and } |f^{(n)}(0)| \leq n! \text{ for } n = 0, 1, 2, \dots\}$ .  
Prove that  $\mathcal{F}$  is a normal family.
2. (a) State Schwarz's Lemma.  
(b) Let  $f$  be a 1–1 analytic mapping from the unit disc  $\Delta = \{z \mid |z| < 1\}$  onto itself such that  $f(0) = 0$ . Prove that  $f$  is of the form  $f(z) = e^{i\theta}z$  for some  $\theta$ .
3. Let  $\Omega_1, \Omega_2$  be connected open subsets of  $\mathbb{C}$  and let  $f: \Omega_1 \rightarrow \Omega_2$  be analytic. For  $v$  harmonic on  $\Omega_2$ , prove that  $v \circ f$  is harmonic on  $\Omega_1$ .
